

Joey Kudish

Full-stack engineer & technical leader with 15+ years of experience building scalable software for startups, agencies, and SaaS companies. I combine deep technical expertise with product strategy and entrepreneurial insight to deliver solutions that streamline operations, enhance performance, and serve thousands of businesses worldwide.

Employment History

Chief Technology Officer at Image Salon

July 2016 — Present

- Led technical strategy and product development for a global photography post-production company serving **6,000+ clients worldwide**.
- Designed and built marketing sites, multilingual customer dashboards, and internal CRM/workflow systems.
- Implemented tools that **cut order processing and admin time by 75%**, significantly boosting operational efficiency.
- Built AI-powered solutions, including **PHAiTO**, an AI-powered Lightroom editor that edits entire catalogs in minutes.

Senior Staff Engineer at Metorik

February 2024 — August 2025

- Designed and developed new integrations and automation features for a SaaS analytics and reporting platform used by thousands of WooCommerce and Shopify stores.
- Introduced an automated testing suite that increased release confidence and reduced bugs in production.
- Delivered performance and usability enhancements across the Laravel/Vue.js codebase, improving merchant experience and operational efficiency.
- Represented Metorik at industry conferences (WordCamp, Laracon), strengthening brand presence and engaging with the developer community.

Senior Solutions Architect at Pantheon

January 2024 — March 2024

- Managed enterprise WordPress migrations and performance optimizations for strategic customers.
- Delivered custom tooling and process improvements to accelerate client onboarding.

Co-Owner & CEO at Turquoise Goat Board Game Cafe

October 2021 — December 2023

- Founded and operated a 60-seat café & retail store with 1,000+ board, card & TCG games.
- Managed a team of 25+, oversaw daily operations, and built a custom Laravel-based inventory system to streamline multi-product management.

Owner & CTO at Spark Consulting Ltd., Vancouver, BC

June 2016 — November 2022

- Delivered custom software, websites, and applications for **30+ clients** across industries including photography, architecture, and real estate.
- Developed scalable solutions with PHP, Laravel, JavaScript, React and Vue.js.

- Built long-term partnerships with clients such as **Image Salon** and **DVLOP**, delivering platforms with measurable ROI.

Code Wrangler at Automattic, Vancouver, BC

May 2012 — June 2016

- Contributed to WordPress.com, WooCommerce, Jetpack, and WordPress core, impacting millions of users globally.
- Developed key features (Publicize, WooCommerce Connect), REST API enhancements, and performance improvements.
- Contributed to Open Source projects (WordPress, Calypso, WooCommerce and others)
